

CLAIM: If our universe was supernaturally created, full of fully mature functioning systems; humans, planets, cosmos etc. We should expect scientific evidence for both a young and old universe (disparaging data).

Key Points

- Science and the supernatural are not incompatible.
<http://www.scienceug.com/science--world-view.html>
- Science is handicapped and cannot observe all of reality. God must be your prime source for knowledge. Supernaturalism VS Naturalism
- If creation / nature looks “old” scientifically, God is not lying to us because He has revealed Himself as a supernatural outer dimensional being and that He used supernatural processes in Creation as well as throughout the Bible. The “book of nature” (not really a “book” - due to interpretation) is not lying to us if things naturalistically look old, because we have God’s revelation about their history and origins.
- God creates fully mature functioning systems, in immediacy (rapidly). Old wine, Adam, Eve, healings, resurrection... These are not partially formed or accomplished in transition requiring time filled processes.
- It is disingenuous to say Jesus can be supernatural (use miracles) in His ministry / life on earth but that He cannot be supernatural in creation; just because we can not “scientifically” (naturalistically) understand how it was done.

Old or Young?

Why I am neither a young earth or old earth creationist.
I am a Supernatural Creationist.

The Nature of Supernatural Creation - Examples from Jesus Ministry.

Limiting oneself to naturalistic scientific observation and explanations on such miracles like changing water to wine or healing the servant’s severed ear; one would conclude that their must have been time filled “natural “processes to get the results. All supernatural acts of God - miracles - would then be “lies of nature”. For example: virgin birth, resurrection and a

new heavens and earth all would be non-scientific, non-natural events. God is not lying to us in the “book of Nature” because He relieved His supernatural nature and claims to have used supernatural processes in Creation. That is why the Christian has to be an unapologetic supernaturalist. Placing the observations of limited humans, aka science above God’s revelation will create inconsistency. Science limited only to naturalistic explanations will always derail the observer of supernatural events in a supernaturally created world. More inconsistencies. I will point out a few.

- One of the best evidences of living in a supernaturally created universe it that we get disparaging data - observations telling us things are old and some things young, depending on what we observe or measure. We should expect disparaging data when observing a supernaturally created system, aka Adam or the cosmos. Without supernatural revelation we will get it wrong every time when only relying on naturalistic observation / science. see The Age of Adam Video
- If Creation took billions of years, will it take billions of years for God to make the new heavens and earth? Will we, in our glorified bodies, be waiting billions of years for natural processes (evolution) to form our new heavenly world, or the creatures living in it? As old earth creationists (OEC) or Theistic Ev. claim it took for the original creation?
- Will death, disease and suffering of animals be a part of Heaven - the new heavens and earth, as they were part of God's good original creation over its billions of years of formation in an OEC view?

- Will catastrophes like hurricanes, volcanic eruptions, earthquakes be part of the new heavens and earth as they were part of God's creation and life on earth before, during and after Eden, in an OEC view?
- If Heaven is a return to Eden, God walking with Man, Believers ruling with God, how different is it from today, if everything we see today, pain, death, suffering etc were part of the Eden world.

Could the universe be young & old?
